ΔE Value Reference	Color Difference(Tolerance)/Acceptable
0.002	Tiny or no, perfectly mathed
0.2-0.5	Small, acceptable
0.5-1.0	Small to Medlum, acceptable for some industries
1.0-2.0	Medlum, acceptable for specifie industry
2.0-4.0	Large, acceptable for specifie Industry
>4.0	Very Large, unacceptable for most industries

▼ ΔE color Difference Scale

$$\sqrt{\Delta E^{*ab}} = \sqrt{(\Delta L^{*})^2 + (\Delta a^{*})^2 + (\Delta b^{*})^2}$$

Δ L+ represents white, Δ L- represents black, Δ a+ represents red, Δ a represents green, Δ b+ means yellow, Δ b- represents blue. When we use CIE*a*b* to show a clolr, L* is balck or whilte. a* is red or green.b* is yellow or green.

▼ CIE LAB

CIE LAB is color space based on the fact that a color can't be both red and green, or both blue and yellow, because these colors oppose each other. So a single data could be used to describe red/green and yellow/blue. When we use CIE L*a*b* to describe a color, L* means lightness, a* means red/green and b* means yellow/blue.

▼ CIE LCH

CIE LCH adopts same color space as L*a*b*, but its L* represents lightness, c* represents saturation and h* represents hue.

CS-3820

Transmittance And Reflectance Spectrophotometer

►► Product Advantages

Transmittance and reflectance in one instrument

Transmittance measurement: D/O Geometry (diffuse illumination, 0 degree viewing) to measure liquid APHA, Pt-Co index, Gardner index and other parameter measurement.

D/8 geometry, simultaneous SCI/SCE measurement

Reflectance measurement: D/8 Geometry (diffuse illumination, 8 degree viewing)

4 Testing Calibers

CS-3820 contains 4 kinds of testing calibers and the largest reaches 25.4mm to meet the color measurement requirement for different kinds of materials.

Double optical path spectrum analysis technology

Simultaneously obtains the sample reflection signal and the light source intensity signal, guarantees the instrument measuring accuracy and the long-term repeatability.

CS-3810

Transmittance Spectrophotometer

►► Product Advantages

Glass and Liquid Color Measurement

Transmitted Spectrophotometer is a spectrophotometer of high-performance which is technically designed to measure the transmittance, absorbency, concentration and Chroma of the materials. The instrument uses D/0 measurement structure and integrates many technologies including light source that has balanced intensity across visible spectrum, the double grating and double optical path splitting system and ETC (Every Test Calibration), which makes the instrument reach a resolution of 0.0001, the standard deviation of the transmittance's repetitiveness in 0.08% and the standard deviation of the chromatic value's repetitiveness is ΔE^*_{ab} 0.015

Adopts CLEDs illuminant

Full-band balanced light source which ensures adequate spectral distribution in the visible range, to avoid the spectral loss of white LED in a particular band, improve the measurement speed and results accuracy.

Every Test Calibration

The standard white board is inside the optical system for has reliable accuracy and repeatability in each test.

Usage of UV-enhanced Silicon Photodiode

Transmittance measure range improved from 0-100% to 0-200%

CS-3800

Top-port Spectrophotometer

►► Product Advantages

The First Bench-top Spectrophotometer in India

CS-3800 is the first bench-top spectrophotometer in China to make up for the corresponding domestic market vacancies. Over the years, its accuracy and performance make great improvement, and now has a huge market.

D/8 geometry, Simultaneous SCI/SCE measurement

Adopt international D/8 geometry (Integrating sphere diffused illumination, 8 degree viewing)
 Simultaneous measurement of SCI/SCE compatible with lighting observation conditions.

Top-port Caliber for Color Measurement

Adopt geometric conditions of D/8 illumination and viewing with upward testing caliber which is easier for testing all kinds of samples. Solid samples (steel, cloth) can be placed directly on the measurement caliber, particles (tablets, master batch), powder (Calcium Carbonate, pigment, coffee), paste objects (tomato sauce) can be placed in a cuvette, then placed in the caliber.

Sideward Spectrophotometer

►► Product Advantages

D/8 geometry, Simultaneous SCI/SCE measurement Adopt international D/8 geometry (Integrating sphere diffused illumination, 8 degree viewing) Simultaneous measurement of SCI/SCE compatible with lighting observation conditions.

Sideward Caliber for Color Measurement

With sideward testing caliber, it is suitable for fix the samples. Solid sample (cloth) can be placed directly on the testing caliber. Powder material and pasty material need to be held by cuvette and then put on the testing caliber. Sideward testing caliber can prevent the scattered powder into the integrating sphere, affecting the test accuracy.

Flexible Fixture

Samples with different thickness and sizes can be fixed on the testing caliber to in case of light entering into the instrument to affect the testing accuracy.

SCS Optical Engine

Adopt innovative single-grating-dual-light-paths light splitting system SCS optical engine which creates the best measurement repeatability for portable spectrophotometers and guarantees accurate measurement of materials surface color.

Camera To See The Measurement Area

In previous measurement instrument, we can only aim at the testing area approximately, and it may introduce errors. Our new spectrophotometers include a camera, so the user can clearly see the testing area to avoid measurement errors.

Automatic Gloss Compensation Technology

Different gloss or different instrument's light source or observe angles greatly affects the measurement of color. The automatic gloss compensation technology guarantees the accuracy of color measurement data for surfaces of different gloss. This research finding is published in international leading SCI included journal Optik.

The same color in different gloss will lead to different measured data.

Every Test Calibration Technology

Currently, most instruments use standard white boards for calibration. When white board is damaged, the instrument's accuracy or precision can not be guaranteed. In CHNSpec's spectrophotometers, it uses innovative ETC(Every Test Calibration); standard white board is included in the optical system, and therefore has reliable accuracy and repeatability for every measurement.

Adopt Cleds Light Source Spectrally Balanced Led Light Source

LED light source has balanced intensity across visible spectrum avoids the spectral deficiency in certain parts of the spectrum in common white LEDs, which guarantees the speed and accuracy of the measurement results. This research has been published in national leading optical journal Optics Letter.

Pantone Color Number Matching

To improve the utility and convenience of our instrument, we develop spectrophotometer with build-in pantone color swatches. After measurement, we could see the color reference number on the screen.

►► Product Advantages

Best Choice For Low Price

CS-3010 is the cheapest colorimeter designed for assembly line. It could meet most color measurement requirement with high accuracy.

Cost-effective

CS-3200 is the update version for CS-10 for the improvement of testing accuracy and measuring YI and WI. It belongs to high cost-effective product.

Camera View

CS-3210 is with build-in micron camera for viewing the measuring area. It is convenient for customer to see the measuring area and suitable for testing patterned and colorful samples.

Power Measurement

CS-3220 provides specular component excluded (SCE) measuring condition. It is designed for the color measurement of powder, pasty materials and highly reflective materials.

Color Number Matching

CS-3260 is with build-in color charts. After measurement, instrument will match three color numbers from the color charts for the colourist reference.

►► Multiple Color Spaces

CIE L*c*h Color Space

CIE L*c*h Color Space

Yxy Color Space

Being the most commonly used testing device, our colorimeter with color display indicators transformation program that makes our device could be used for color measurement in many different industries. It does not need convert the measurement data by manual which greatly improve the work efficiency.

►► PC Software

PC Color QC System

It can connect colorimeter with PC for color management. Real-time display of qualified or not, generate testing report, save the color data, suitable for the enterprise to evaluate and manage the color data.

Gloss Meter CS-3000/3800

►► Product Advantages

High Precise

Every instrument has verification certificate from National Modern Metrology and Instruments Testing Laboratory.

Comfortable Grab Feeling

The shell is made by Dow Cornig TiSLV material, a desirable elastic material. It is resistant to UV and bacteria and does not cause allergy. All desing are for better user experience

High Stability

Every gloss meter made by us has done the following tests:

412 calibration tests

43200 stability tests

110 hours of accelerated aging test

17000 vibration tests

Large Battery Capacity for 50000 continuous tests

We fully utilize every space of the device and specially custom made advanced high density lithium battery which ensures continuous testing for 54300 times.

Measurement Light Spot(mm)	20° : 10°, 10° 60° : 9*15 85° : 5*38	60°: 9*15
Measurement Range	20° : 0-2000GU 60° : 0-1000GU 85° : 0-160GU	60°: 0-1000GU
Measurin Mode	0-100: 0.10GU	>100: 1GU
Stability	simple mode and statstics mode	
Measurement Repeatability	0-100GU:0.2GU	100-2000GU:0.2%GU
Measurement Standard	conform to JJG 696 standard for first class gloss meters	
Measurement time	less than 1s	0.5s
Storage Memory	100 pcs standards; 1000 pcs samples	
Size: (L*W*H)	165*51*77mm	
Weight	about 400g	
Language	English	
Battery Capacity	3000mAh Lithium Battery	
Interface	USB,Bluetooth(optional)	
Working Temperature	0-40°C	
Humidity	<85%, no condensation	
Accessory	5V/2A charger, USB cable, operating manual, software CD, calibration tile, verification certification	

Paint and printing Ink Color Matching system

CHNSpec's Color Matching System	Artificial Color Matching
Provide various of formula according to the instrument testing result	The chemist could only provide limited color scheme
Color value and formula data reduce labor cost and ensure stable production	The color scheme is not stable and entirely depends on the experience of chemist
Simple operation and repaid result	Complicated and requires experienced chemist for long time matching
Get electronic sample value and formula data	Color chart and formula can not be recorded well
Formula is higher accuracy and increasing the efficiency of chemist	Chemist need adjust formula for many times. It spends longer time, increasing the cost and reduces efficiency
Old and waste material can be used for color matching which saves cost	A large number of waste and old materials can not be fully used

Color Swatch and Light Box

Pantone Color Swatch

Pantone C/U Color Swatch includes 644 kinds of new colors which added in 2010. In 2015, new color chart adds blusher, pink, blue, green and purple. Designer or printing workers can use it for sparking inspiration.

Light Box

Light box is also called light booth or color matching cabinet. It is the illuminant for checking the samples color difference. After connect with power, press the illuminant button, the corresponding light will be switched on. Then we could compare the samples color inside it. Multi light sources could be chosen at the same time. Customer could choose the suitable light source according to his or her need and the most commonly used light source is D65.

Four/Five/Six Illuminations Color Light Box

Low power consumption, no heat producing, high efficiency, small volume, simple operation, low cost, configuration.

1200L Six Illuminations Color Light Box

Six Illuminations Color Light Box contain 6 kinds of illuminations: D65, TL84, CWF, UV, U30 and F/A.

►► Regulatory compliances

►► Corporate Social Responsibility

Analytical Foundation is a Nonprofit Organization (NGO) found for the purpose of:

Analytical Foundation

1. Research & Innovation Scientist's awards / QC Professional Award : Quality life is possible by innovation only and the innovation is possible by research only, hence ANALYTICAL FOUNDATION is committed to identify such personalities for their contributions across various field of Science and Technology and awarding them yearly. To participate for award, send us your details of research / testing / publication at info@analyticalfoundation.org

2. Improving quality of life by offering YOGA Training courses, Work shops / Seminars etc.

3. ANALYTICAL FOUNDATION aims to DETOXYFY human minds, souls and body by means of Yoga, Meditation, Ayurveda, Health Care, Awards, Media, Events, Camps etc.
